

Explosion Protection International Training Ltd

Complus Program - ATEX Standards Directives 94/9/EC & 1999/92/EC

Course Overview

A competence based course designed to advise on the current requirements of the ATEX Directives and supporting documentation for electrical and non-electrical equipment for use in potentially explosive atmospheres. The course will provide an understanding of the completion of technical files, certification, labelling of equipment and the conformity assessment procedures for compliances. It also provides an extension in content in the application of DSEAR.

Course Content

S.I. No. 192 and DSEAR S.I. No. 2776 where applicable:

- Products within scope
- Zones of use, equipment groups, and categories
- Designation of notified bodies
- Documents issued by notified body and manufacturer
- EC Type-examination and declaration of conformity
- Internal control of production
- Essential health and safety requirements
- Ignition risk assessment and reporting
- Applicable harmonised standards
- Structure of the technical files
- CE marking of equipment and other references
- Quality Assurance
- Application to repaired, modified and hired products
- Consideration of PED, Machinery, and EMC Directives
- Reference to the relative parts of DSEAR
- Written Assessment

Target Audience

Personnel involved in manufacturing, the assembly of equipment and on-site employers who require an understanding of DSEAR for the safety of workers and the use of equipment potentially at risk in hazardous areas.

Suitable for project engineers, installers and Health & Safety personnel, who require meeting with the compliances of the Directives and the application of DSEAR (The Dangerous Substances and Explosive Atmospheres Regulations).

Venue

Blackburn Business Park
Aberdeen, UK
